PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence, Big Data, and Cybersecurity, with a proven track record of delivering automation solutions that drive measurable efficiency gains across military, enterprise, and SME environments. Combines strong Python scripting, full-stack development, and cloud skills with a designer's eye for user experience. Recognized for independent initiative and outstanding performance under minimal supervision.

EXPERIENCE

Administrative Support Assistant – Awards & Medals

2023 – 2025

Singapore Armed Forces (SAF Personnel Hub East)

Singapore

- Awarded an **Outstanding** Performance & Conduct grade for applying a programming background to improve routine unit work processes.
- Engineered Python automation scripts for awards monitoring, tracking, and NSEA letter generation, reducing manual data entry and improving accuracy.
- Built automated e-HR update workflows and data-validation pipelines that tightened record integrity across the personnel database.
- Coached peers and superiors on automation methodology, enabling team-wide productivity gains and a formal LTC-level commendation.

Automation Engineer (Intern) – Business Process Automation

2022 – 2023

A2A Trading Pte Ltd

Singapore

- Architected and delivered a comprehensive Python automation suite from scratch that replaced multiple manual operations workflows.
- Built bots for web scraping, data extraction, and transformation feeding downstream reporting systems.
- Automated scheduled report generation and email distribution, freeing operations staff from repetitive daily tasks.
- Implemented real-time monitoring with alerts and data-validation pipelines to safeguard reporting accuracy.

IT Support Analyst (Intern) – Enterprise IT Operations

2022

NCS Pte Ltd

Singapore

- Streamlined Tier-1 / Tier-2 support operations by authoring troubleshooting documentation adopted by the wider support team.
- Designed a ticket triaging system to prioritize high-impact incidents and reduce mean time to resolution.
- Produced reusable customer communication templates that accelerated response times and standardized tone.
- Surfaced process-improvement opportunities through ticket data analysis.

Web Designer & Developer (Freelance)

2021

Eastern Wok Pte Ltd

Singapore

- Delivered an end-to-end redesign of the restaurant's web presence with a responsive, mobile-first UI.
- Built a custom WordPress theme tuned for performance, including an online menu optimized for conversion.
- Applied SEO and page-speed best practices to improve discoverability and load times.

EDUCATION

Bachelor of Computer Science – Double Major: AI & Big Data, Cybersecurity

2024 – 2026

University of Wollongong

- Coursework: Modern AI, Software Development Methodology, Ethical Hacking, AI and Cybersecurity.

Diploma in Cybersecurity & Digital Forensics

2020 – 2023

Temasek Polytechnic

- Coursework: Network Technology, Computational Thinking, System Administration, Security & Technology Innovation.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, PHP, HTML, CSS, Swift
Security & Forensics	Digital Forensics, Penetration Testing, Ethical Hacking
Web & Mobile	Full-Stack Web Development, WordPress, iOS (SwiftUI, Xcode)
Cloud & Infrastructure	AWS, Azure, Google Cloud Platform, Linux System Administration
Design & Creative	Figma (UI/UX), Adobe Photoshop, Canva, Final Cut Pro
Automation & Data	Web Scraping, Scripting, Workflow Automation, Data Validation Pipelines

HONORS & RECOGNITION

- **Outstanding** Performance & Conduct Grade, Singapore Armed Forces (2025) – with written commendation from LTC Ng Meng Ghee Kervin (Head, SAF PERS HUB EAST) for applying programming expertise to enhance unit efficiency.
